To shape and dry fondant flowers

Description

With these flower shaping bowls you can shape and dry flowers and leaves made of fondant, flower paste or modelling mass. In this way, the flowers get a particularly beautiful and natural rounding. The opening in the middle makes it easier to stick in and attach a flower wire.

This professional tool is made of high-quality, food-safe and stable plastic. We advise to wash them up with running, warm water straight after use. However, they are also dishwasher-proof.
