

Food colour - Powder

Article number: 395008

Powder - highly productive
Colour: super white
filling quantity: 20 g

Super white is particularly well-suited to dying buttercream and marzipan white.

Description

Our food colour powder can be used for powdering surfaces - but also in liquid form, mixed with some alcohol, to paint ornaments and decorations. Use a fine brush and apply it on dry surfaces. Even chocolate can be coloured with our food colour powder. Give free rein to your fantasies.

In our range you can find a lot of different colours.

Powder for dusting and painting on dry surfaces and for colouring oil- and grease-based food like chocolate.

In display package for hanging up. With instructions.
The item is excluded from the exchange.

Manual

Application: Super white is particularly well-suited to dying buttercream and marzipan white. Mix the food coloring powder dry or with a little alcohol and carefully work into the relevant food, taking note of the dosage.

Store in a dark, cool and dry place.

Ingredients

Colorant: titanium dioxide (E171); filler: silicon dioxide (E551),
